**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claim 10 recites the limitation "latex resin particle" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-11, 19 and 21-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patel et al [20030180650] in view of Vanbesien et al [6576389]. Patel et al teaches a latex emulsion in which a negatively charged coagulant facilitates the aggregation of a basic cationic latex and a cationic wax dispersion. The submicron wax particles are [0039] the same as claim 3 and the emulsion has submicron resin latex particles note [0048]. The pigment dispersion of pigment, cationic wax and cationic surfactant is also taught in [0048]. Cationic surfactants are taught in [0065]. Different gloss levels are taught by Vanbesien et al of a latex emulsion using an emulsion/aggregation/coalescence process for forming a toner particle with a wax dispersion note Col.6 line 67. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use wax

dispersion of a cationic wax and surfactant in the emulsion process of forming a toner that will have the physical properties to control the level of gloss of a developer image.

3. Claims 2, 12-18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
